SAN LEANDRO, Calif.--(BUSINESS WIRE)--March 4, 2010--Energy Recovery, Inc. (Nasdaq:ERII), a leader in the design and development of energy recovery devices for desalination, announced today the unaudited results of its fourth quarter and fiscal year ended December 31, 2009. In the fourth quarter of 2009, ERI achieved net revenue of \$15.7 million, a 28% decrease over the same period last year and within the Company's guidance range of \$14.5 million to \$16.5 million. For the twelve months ended December 31, 2009, net revenue was \$47.0 million, which represented a decrease of 10% over net revenue of \$52.1 million for the twelve months ended December 31, 2008. ERI reported net income of \$1.7 million, or \$0.3 per diluted share, for the three months ended December 31, 2009 compared to \$5.3 million, or \$0.10 per diluted share, for the same period last year. Full year net income was \$3.7 million, or \$0.07 per diluted share, compared to \$8.7 million, or \$0.18 per diluted share, for the same period last year.

"We experienced some softness in net revenues in 2009 due to delays in desalination project financing. However, in September when the turmoil in the financial markets began to stabilize, business began to pick up and we had a record year in terms of new order bookings," said G.G. Pique, President and CEO of Energy Recovery, Inc. "On December 21, we closed the acquisition of Pump Engineering and we are already hard at work with the integration of our two companies. The acquisition of Pump Engineering broadens our product for desalination, opens up the pump market for us, and allows us to provide energy-efficient solutions to industries outside of desalination like gas processing."

Non-GAAP Financial Measures

In evaluating the operating performance of Energy Recovery's business, Energy Recovery management utilizes financial measures described in this press release that exclude certain non-cash charges and charges related to the purchase of Pump Engineering required by U.S. generally accepted accounting principles, or GAAP. Energy Recovery believes this additional information provides investors and management with additional insight into its underlying core operating performance.

For the calculation of Adjusted EBITDA, net income was adjusted for depreciation and amortization expense of \$557,000 and \$1.2 million, interest (income) expense of \$1,000 and (\$56,000), taxes of \$1.4 million and \$2.5 million, stock-based compensation expense of \$594,000 and \$2.4 million and a purchase accounting adjustment for sale of acquired inventory of \$47,000 for the fourth quarter and year end fiscal 2009 respectively.

In the guidance estimates below for the first quarter and full year 2010, net income and earnings are adjusted for the purchase accounting required under GAAP for the acquisition of Pump Engineering. For the full year, the estimates assume adjustments of a purchase accounting adjustment for sale of acquired inventory of \$870,000, \$2.5 million in amortization of intangibles, and a tax benefit of approximately \$1.0 million that will be nullified as a result of eliminating the intangible amortization and purchase accounting expense.

A reconciliation of Energy Recovery's non-GAAP financial measures for the fourth quarter and full year 2009 to the most directly comparable GAAP measures can be found under the heading "Energy Recovery Non-GAAP Financial Reconciliation" below.
